

LEARNING OBJECTIVES

- To extend the knowledge of robotic assisted partial nephrectomy (RAPN) providing indications and limits of the technique.
- To optimize perioperative, functional and oncological outcomes after RAPN.
- To present RAPN live surgeries using different surgical approaches and different resection techniques for the conservative treatment of renal tumors.
- To provide the current evidences of a possible advantage of robotic assisted radical nephrectomy (RARN) to treat locally advanced renal tumors.
- To present RARN live surgeries in different clinical settings.
- To present the latest results of the major Italian studies on kidney cancer and RAPN (SIB3 Study, RECORd2, CLOCK1 and CLOCK 2).
