# Niente di meglio di uno studio osservazionale ...

- Descrizione di fenomeni sanitari
- Valutazione di bisogni sanitari
- Generazione di ipotesi
- Valutazioni di appropriatezza
- Abitudini di vita (es. fumo)
- Esposizioni ambientali (es. inquinamento)
- Sistemi organizzativi
- Procedure cliniche entrate nella pratica senza validazione formale

**Progetto:**

**ASSOCIATION AMONG OBESITY,  
INFLAMMATION AND OUTCOME IN  
PATIENTS WITH ADVANCED LUMINAL  
BREAST CANCER TREATED WITH CDK 4/6  
INHIBITORS**

**NEW**

Association among obesity, inflammation and outcome in patients with advanced luminal breast cancer treated with CDK 4/6 inhibitors.

## PROPONENTE

**Dr. EMANUELA ROMAGNOLI**

*UOC Oncologia AV3 Macerata*

Email: [emanuelaromagnoli@gmail.com](mailto:emanuelaromagnoli@gmail.com)

**NEW**

Association among obesity, inflammation and outcome in patients with advanced luminal breast cancer treated with CDK 4/6 inhibitors.

## QUESITO E OBIETTIVI

### Primary objectives:

to evaluate the association between **neutrophil-to-lymphocyte ratio (NLR)** and **systemic immune inflammation index (SII =  $P \times N/L$ )** and **outcome** in patients with breast cancer in treatment with a CDK 4/6 Inhibitors.

### Secondary objectives:

to describe the **variations of NLR and SII** during treatment with a CDK 4/6 Inhibitors.

to analyze the association between **BMI** in patients with breast cancer and in treatment with a CDK 4/6 Inhibitors.

Association among obesity, inflammation and outcome in patients with advanced luminal breast cancer treated with CDK 4/6 inhibitors.

## QUESITO E OBIETTIVI

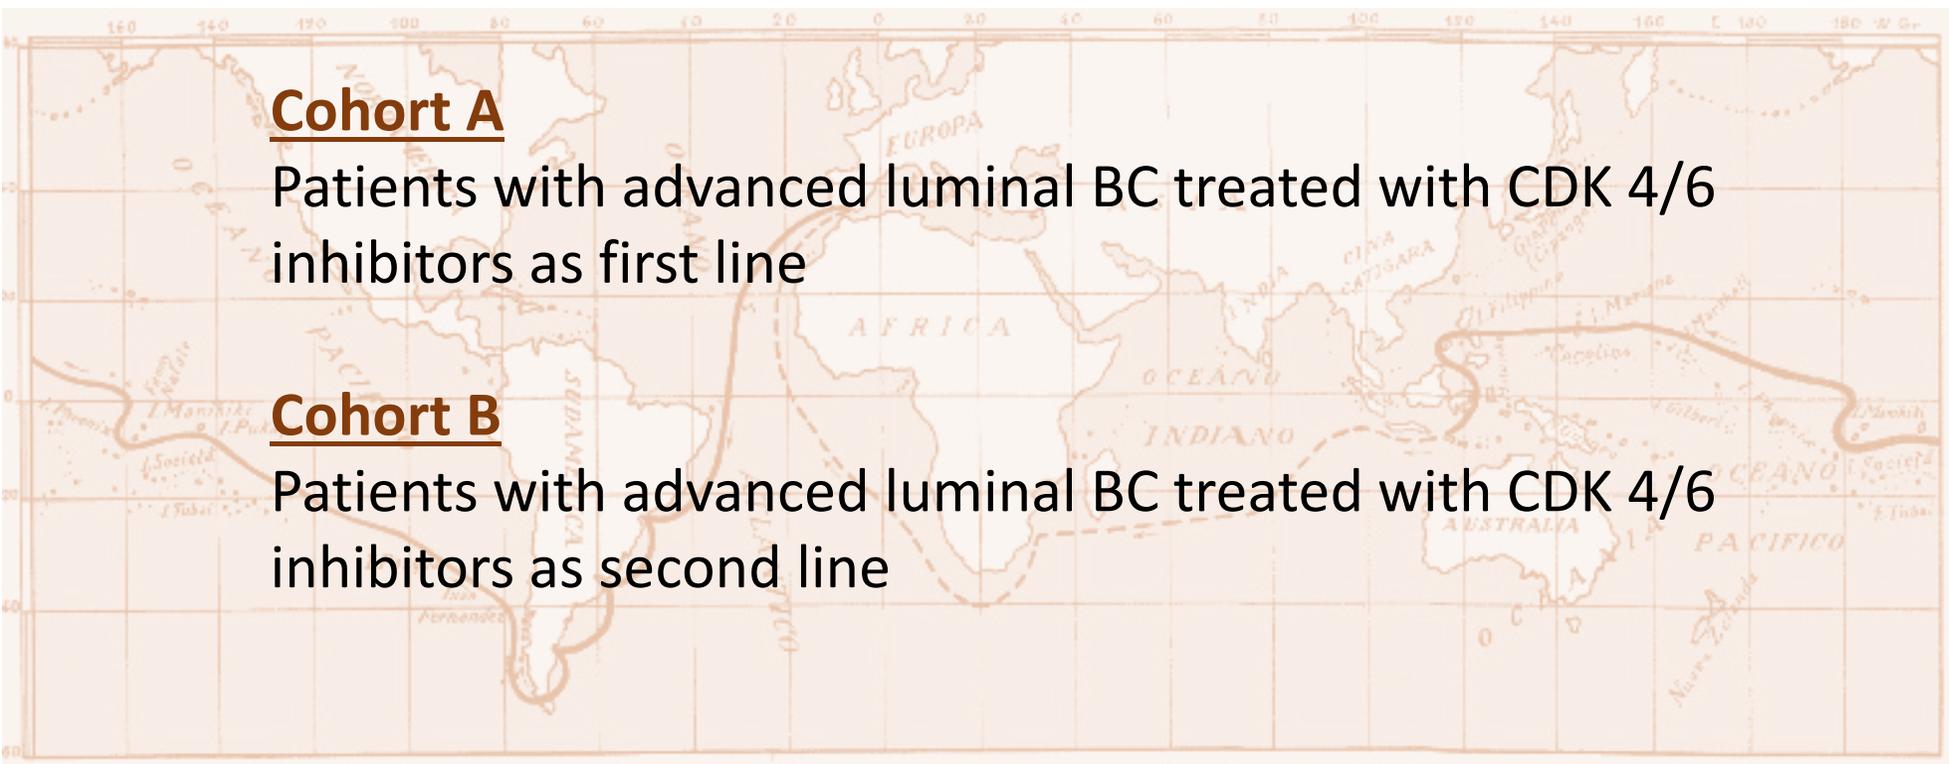

The study aim to analyze two cohorts of patients:

### Cohort A

Patients with advanced luminal BC treated with CDK 4/6 inhibitors as first line

### Cohort B

Patients with advanced luminal BC treated with CDK 4/6 inhibitors as second line

Association among obesity, inflammation and outcome in patients with advanced luminal breast cancer treated with CDK 4/6 inhibitors.

# The IDENTITY Study: Inherited brEast caNcer iTalian reglSTrY:

## QUESITO E OBIETTIVI

### Primary objectives:

- To obtain and **centralize data about cancer prevention strategies** in women with a germline deleterious mutation in BRCA1-2 with or without a history of breast cancer in Italy

### Secondary objectives:

- To **evaluate clinico-radiological follow-up** (type and frequency) of women with a germline deleterious mutation in BRCA1-2 with or without a history of early breast cancer
- To **evaluate treatment** of early and/or advanced breast cancer in women with a germline deleterious mutation in BRCA1-2
- To **evaluate disease-free survival and/or progression-free survival and overall survival** of women with a germline deleterious mutation in BRCA1-2 treated for early and/or advanced breast cancer

# The IDENTITY Study: Inherited breast cancer Italian registry: QUESITO E OBIETTIVI

The study is composed of a retrospective cohort (A) and a prospective cohort (B):

**Cohort A (Retrospective):**

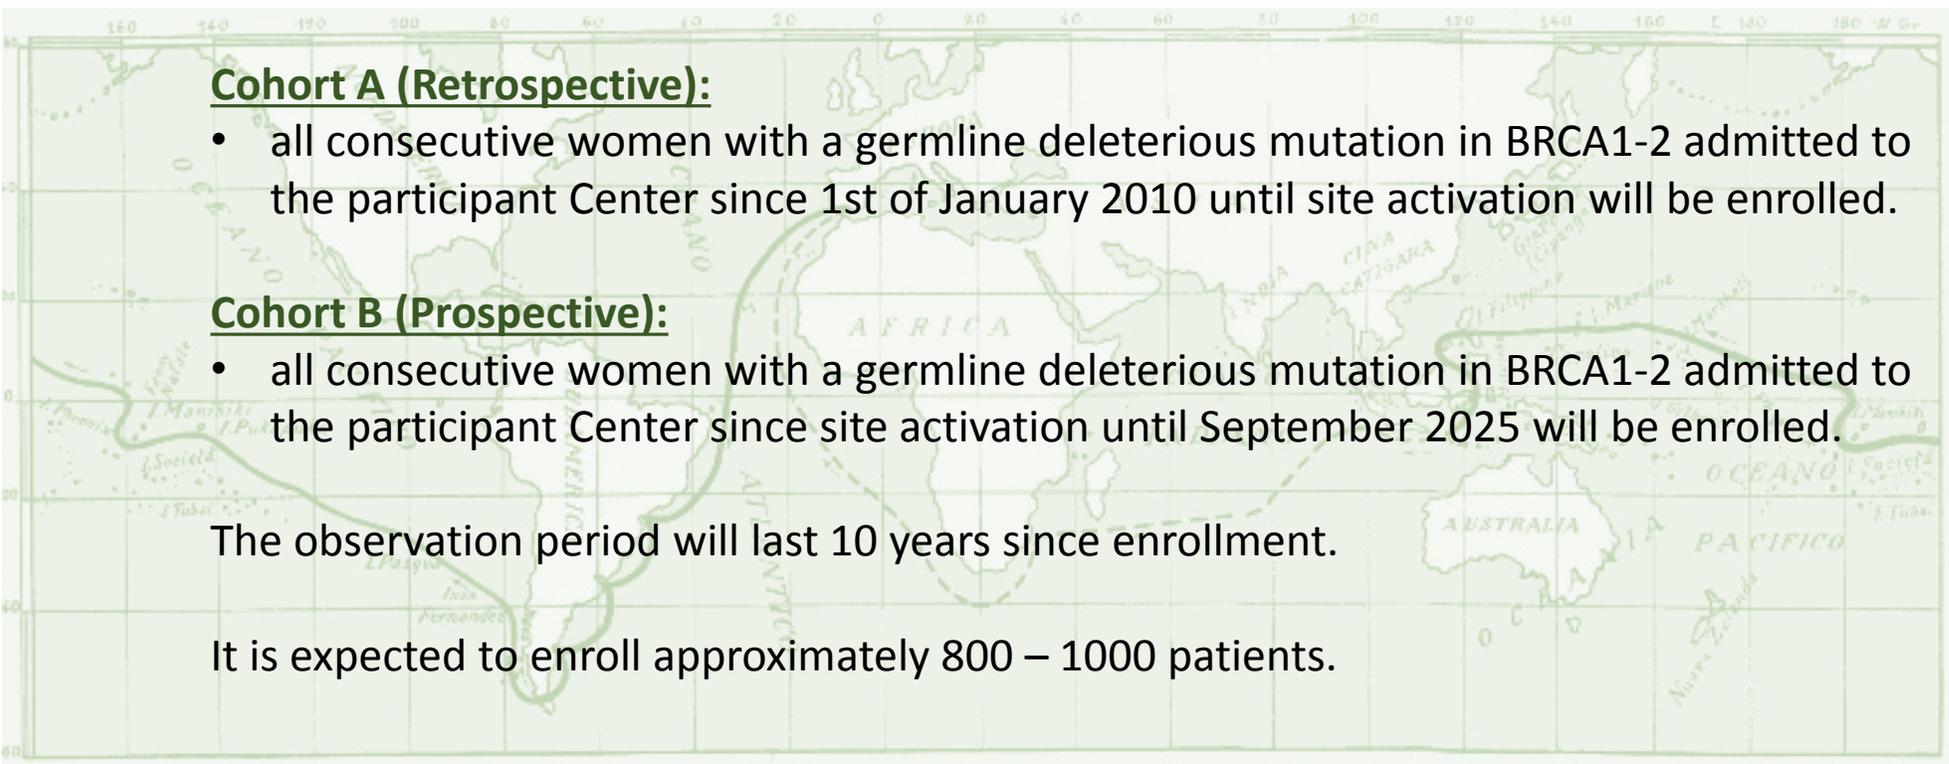

- all consecutive women with a germline deleterious mutation in BRCA1-2 admitted to the participant Center since 1st of January 2010 until site activation will be enrolled.

**Cohort B (Prospective):**

- all consecutive women with a germline deleterious mutation in BRCA1-2 admitted to the participant Center since site activation until September 2025 will be enrolled.

The observation period will last 10 years since enrollment.

It is expected to enroll approximately 800 – 1000 patients.

# The IDENTITY Study: Inherited breast cancer Italian registry:

## QUESITO E OBIETTIVI

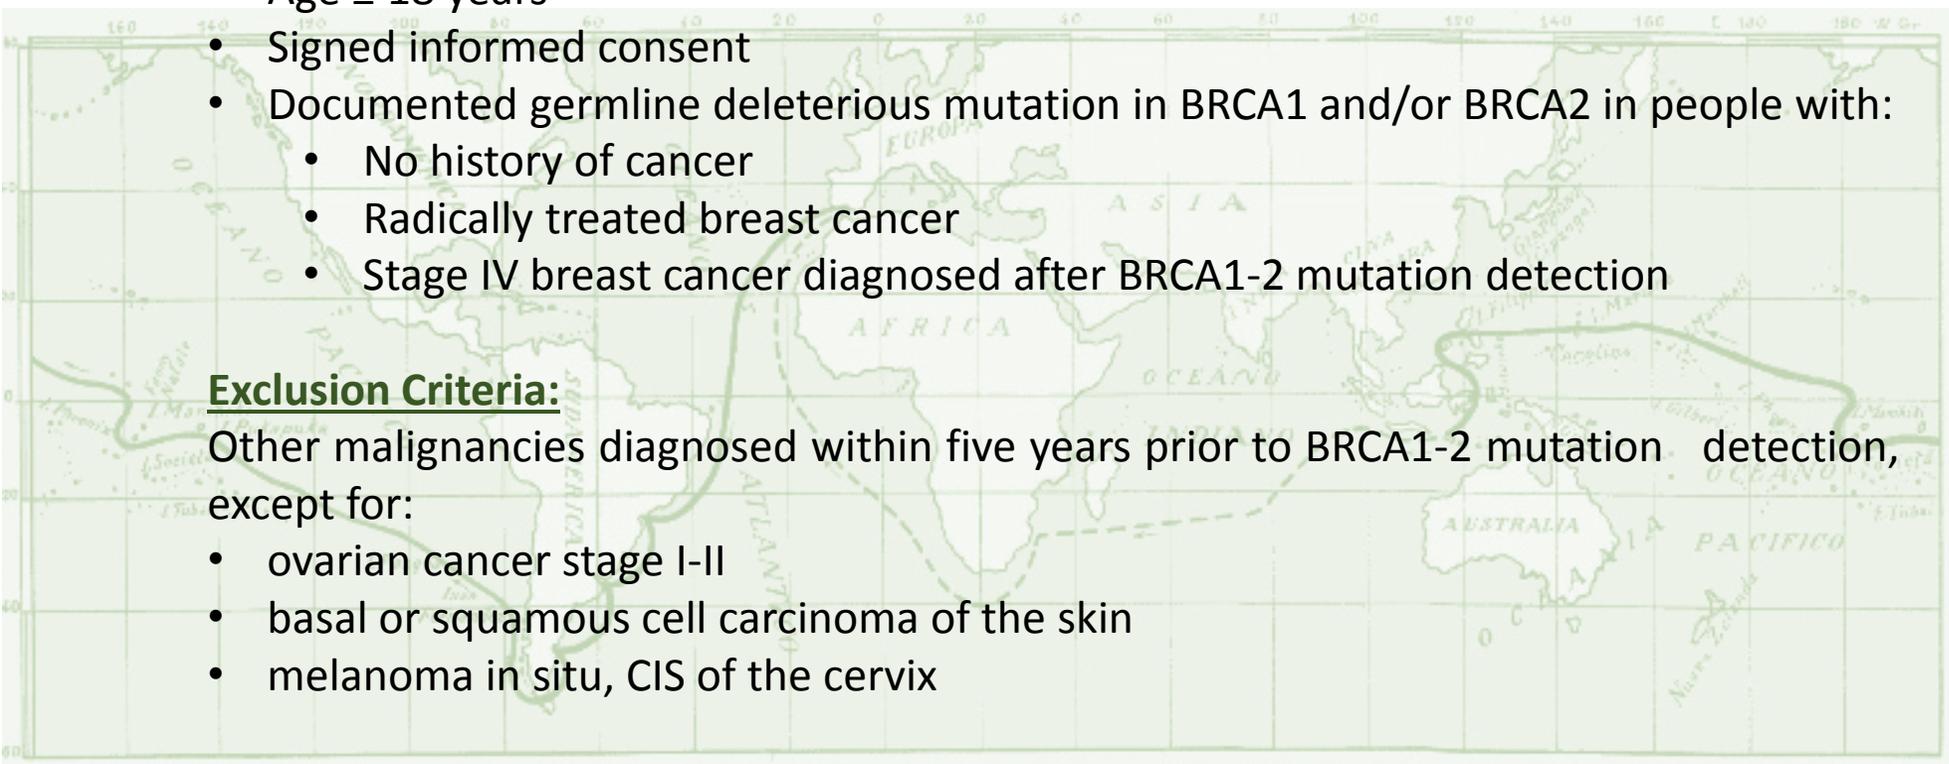

### Inclusion Criteria:

- Female sex
- Age  $\geq$  18 years
- Signed informed consent
- Documented germline deleterious mutation in BRCA1 and/or BRCA2 in people with:
  - No history of cancer
  - Radically treated breast cancer
  - Stage IV breast cancer diagnosed after BRCA1-2 mutation detection

### Exclusion Criteria:

Other malignancies diagnosed within five years prior to BRCA1-2 mutation detection, except for:

- ovarian cancer stage I-II
- basal or squamous cell carcinoma of the skin
- melanoma in situ, CIS of the cervix

Email: [alberto.zambelli@asst-pg23.it](mailto:alberto.zambelli@asst-pg23.it)

An automated I2B2-based register for a network data-sharing and development of outcomes research studies

## QUESITO E OBIETTIVI

### Objectives:

The implementation of i2b2 platform at different GIM-sites to contribute to an i2b2-GIM network, that paves the way for innovative programs of data-sharing and multiple outcomes research studies.

An automated I2B2-based register for a network data-sharing and development of outcomes research studies

## QUESITO E OBIETTIVI

**I2b2 is an effective, exportable, academic, open-source data-warehouse system**

**I2b2 allows to share data from different archives and different institutions**

**I2b2 provides an automated temporal electronic phenotyping (clinical pathway) and supports processes of learning intelligence for research and treatment**
