

RATIONALE

Male genital surgery represents a field of great scientific interest, in continuous rapid evolution. The scientific program is centered on live surgery (3 operating theaters in parallel) and the most recognized experts will be invited to perform a real live surgery. The focus of our masterclass will be the surgical strategies, the most interesting technical aspects, the latest technological proposals available today and prosthetic implants for the treatment of erectile dysfunction and urinary incontinence.

However, the scientific program of the congress is not limited to the transmission and discussion of surgical interventions. The first and second day will be dedicated to the presentation and collegial discussion of the pathologies presented by patients in the operating room.

MAIN TOPICS

- Aesthetic-functional surgery of the penis
- Medical rehabilitation and surgical therapies in male urinary incontinence
- New therapeutic approaches and new technologies in erectile dysfunction
- New therapeutic approaches and new technologies in benign prostatic hypertrophy
- Nutraceuticals in couple infertility in benign prostatic hypertrophy and in Peyronie disease
